SNOW REMOVAL TOOLS

SNOW SHOVELS

Multifunctional shovel (38 cm)

This type of snow shovel is manufactured from highest quality plastic, which together with an aluminium ferrule and a reinforced handle guarantees a long life span and durability of the tool.

The scoop is screwed onto the shaft of the shovel.

The shaft can be 1 m or 90 cm long!

The shovel is multifunctional: it can be used for snow, sand, coal and powders (and other loose materials) in building works, etc.

Shovel width: 38cm
Shovel height: 50cm
Shank: wood
Shank diameter: 38mm
Shank length: 100
Total height: 130cm

Snow Shovel (46 cm)

The snow shovels are of the simplest kind, intended for the mass market due to its low price.

Galvanising prevents corrosion which allows the shovel to be stored in various conditions without the risk of the product's value decreasing.

The shovel's most important feature is its strength.

Shovel width: 46cm
Shovel height: 37cm
Shank diameter: 32mm
Shank length: 100
Total height: 130cm

Snow Shovel (44 cm)

The snow shovels are of the simplest kind, intended for the mass market due to its low price.

Galvanising prevents corrosion which allows the shovel to be stored in various conditions without the risk of the product's value decreasing.

The shovel's most important feature is its strength.

Shovel width: 44cm
Shovel height: 35cm
Ferrule: aluminium profile
Shank: wood
Shank diameter: 32mm
Shank length: 100
Total height: 130cm

Snow Shovel (45 cm)

The snow shovels are of the simplest kind, intended for the mass market due to its low price.

Galvanising prevents corrosion which allows the shovel to be stored in various conditions without the risk of the product's value decreasing.

The shovel's most important feature is its strength.

Shovel width: 45cm
Shovel height: 37cm
Shank: wood
Shank diameter: 32mm
Shank length: 100
Total height: 130cm

Snow Shovel (50 cm)

The snow shovels are of the simplest kind, intended for the mass market due to its low price.

Galvanising prevents corrosion which allows the shovel to be stored in various conditions without the risk of the product's value decreasing.

The shovel's most important feature is its strength

Shovel width: 50cm
Shovel height: 43cm
Shank: wood
Shank diameter: 38mm
Shank length: 100
Total height: 130cm

Snow Shovel (50 cm)

This type of snow shovel is manufactured from highest quality plastic, which together with an aluminium ferrule and a reinforced handle guarantees a long life span and durability of the tool.

Shovel width: 50cm
Shovel height: 43cm
Shank: wood
Shank diameter: 38mm
Shank length: 100
Total height: 130cm

Shovel width: 50cm
Shovel height: 43cm
Shank: wood
Shank diameter: 38mm
Shank length: 100
Total height: 130cm

Snow shovel for kids

With its small dimensions and light weight, the snow shovel is intended mainly to be used by children.

We recommend the purchase of the product as part of a set with an adult snow shovel, so that children instead of getting under foot can enjoy joining in when clearing the snow.

Shovel width: 21cm
Shank: wood
Shank length: 60
Total height: 87cm
Height: 29cm

Ice scraper

A wide ice scraper made from a highly-resistant metal and a wooden shaft.

Shank: wood
Shank diameter: 38mm
Shank length: 100
Total height: 115cm
Scraper width: 20cm
Scraper height: 20cm

SNOW RAKES

Snow rake (82 cm)

The snow rake is made from highest quality plastic protected by an aluminium ferrule and equipped with a metal tube used for pushing the rake.

Two wheels make transporting snow easy!

Shank: steel
Total height: 135cm
Width: 82cm
Height: 45cm

Snow rake (82 cm)

Two wheels make transporting snow easy!

Shank: steel
Total height: 135cm
Height: 45cm
Width: 82cm

GARDEN TOOLS

LEAF RAKES

'Large Canada' leaf rake

Small leaf rakes made from plastic, exceptionally resistant to damage thanks to their reinforcement.

They are ideal for raking large areas . They are truly multifunctional.

Height: 56cm

Width: 60cm

'Medium Canada' leaf rake

Medium leaf rakes made from plastic, exceptionally resistant to damage thanks to their reinforcement.

They are ideal for raking fallen leaves. They are truly multifunctional.

Height: 29cm

Width: 45cm

'Small Canada' leaf rake

Small leaf rakes made from plastic, exceptionally resistant to damage thanks to their reinforcement.

They are ideal for raking fallen leaves. They are truly multifunctional.

Height: 23cm

Width: 42cm

BOW RAKES

Bow rake (18-Tine)

Large hay rakes with 18 tines, made from light, highly-durable plastic.

There are two different wooden shafts available for both leaf and hay rakes, which are 130 cm or 150 cm long.

Height: 20cm

Width: 63cm

Straight bow rake (14-Tine)

Straight hay rakes with 14 tines, made from light, highly-durable plastic.

There are two different wooden shafts available for both leaf and hay rakes, which are 130 cm or 150 cm long.

Height: 10cm

Width: 58cm

Bow rake (16-Tine)

Traditional hay rakes with 16 tines, made from light, highly-durable plastic.

There are two different wooden shafts available for both leaf and hay rakes, which are 130 cm or 150 cm long.

Height: 9cm

Width: 58cm

Straight bow rake (16-Tine)

Straight hay rakes with 16 tines, made from light, highly-durable plastic.

There are two different wooden shafts available for both leaf and hay rakes, which are 130 cm or 150 cm long

Height: 7cm

Width: 58cm

BUILDING TOOLS

BUCKETS

Builders bucket (12,5 QT)

Builders buckets with a 12,5 QT capacity, made from a flexible type of plastic, resistant to damage.

Buckets are equipped with metal handles covered with contoured plastic covers, which make lifting the buckets easier.

Top diameter: 30cm
Height: 27cm
Bottom diameter: 21cm

Builders bucket (17 QT)

Builders buckets with a 17 QT capacity, made from a flexible type of plastic, resistant to damage.

Buckets are equipped with metal handles covered with contoured plastic covers, which make lifting the buckets easier.

Top diameter: 35cm
Height: 28,5cm
Bottom diameter: 25,5cm

Builders bucket (21 QT)

Builders buckets with a 19 QT capacity, made from a flexible type of plastic, resistant to damage.

Buckets are equipped with metal handles covered with contoured plastic covers, which make lifting the buckets easier.

Top diameter: 39cm
Height: 27cm
Bottom diameter: 27cm

CONTAINERS

Building container (47,5 QT)

Building containers with a 47,5 QT capacity, made from plastic and intended to be used to prepare all kind of mortar mixtures.

The containers are made from a flexible type of plastic, thanks to which they are resistant to impact.

Shovel height: 59cm
Height: 28cm
Width: 39cm

Building container (63,5 QT)

Building containers with a 63,5 QT capacity, made from plastic and intended to be used to prepare all kind of mortar mixtures.

The containers are made from a flexible type of plastic, thanks to which they are resistant to impact

Shovel height: 70cm
Height: 30cm
Width: 40cm

Building container (84,5 QT)

Building containers with a 84,5 QT capacity, made from plastic and intended to be used to prepare all kind of mortar mixtures.

The containers are made from a flexible type of plastic, thanks to which they are resistant to impact

Shovel height: 77cm
Height: 29cm
Width: 47cm

HOME IMPROVEMENT

PLASTIC BUCKETS

Plastic bucket (12,5 QT)

General purpose buckets with a 12,5 QT capacity, made from a flexible type of plastic, resistant to damage.

Buckets are equipped with metal handles covered with contoured plastic covers, which make lifting the buckets easier.

Top diameter: 30cm
Height: 27cm
Bottom diameter: 21cm

Plastic bucket (17 QT)

General purpose buckets with a 17 QT capacity, made from a flexible type of plastic, resistant to damage.

Buckets are equipped with metal handles covered with contoured plastic covers, which make lifting the buckets easier.

Top diameter: 35cm
Height: 28,5cm
Bottom diameter: 25,5cm

Plastic bucket (21 QT)

General purpose buckets with a 21 QT capacity, made from a flexible type of plastic, resistant to damage.

Buckets are equipped with metal handles covered with contoured plastic covers, which make lifting the buckets easier.

Top diameter: 39cm
Height: 27cm
Bottom diameter: 27cm

OPENWORK BASKETS

Openwork basket (42 QT)

Openwork baskets with a 42 QT capacity, made from a flexible type of plastic, thanks to which they can take heavy loads and are resistant to impact.

As they are made from plastic, they are light and can be used around the house, garden and also for jobs in agriculture (vegetables, fruit, etc.).

Top diameter: 40cm
Height: 35cm
Bottom diameter: 30cm

Openwork green basket (53 QT)

Openwork green-colored baskets with a 53 QT capacity, made from a flexible type of plastic, thanks to which they can take heavy loads and are resistant to impact.

As they are made from plastic, they are light and can be used around the house, garden and also for jobs in agriculture (vegetables, fruit, etc.).

Top diameter: 50cm
Height: 37cm
Bottom diameter: 35cm

Openwork basket (53 QT)
